

## Resources to support program planning, implementation and evaluation using a health equity lens

---

The purpose of this handout is to share resources that address the topic of health equity and support the integration of planning practices which promote health equity into public health program planning, implementation and evaluation. Highlighted below are a selection of relevant resources; however, it is not intended to be an exhaustive list. This handout is supplementary material for a workshop by PHO health promotion consultants Samiya Abdi and Kim Bergeron at The Ontario Public Health Convention 2016 titled “Strategic steps towards equitable and inclusive public health programming” presented on April 5, 2016. The resources included have been found to be useful and practical and are also freely accessible. They are presented in alphabetical order.
